filtration in the schools. Some of the units will be placed in portables as they can be a challenge when it comes to proper ventilation.

v) Responding to Paula Lima, Superintendent Mathew Thomas clarified that, regarding air conditioning, a feasibility study was done a few years ago and the cost to bring air conditioning to schools that do not currently have it would be over \$300 million. The Board receives about \$25 million in funding every year to address critical repair needs. Associate Director Daniel Del Bianco added that air scrubbers do not offer any form of air conditioning and that they only filter the air in the room. If the Ministry funding of \$1.7 million were to be used for air conditioning, it may only just take care of two schools.
